Hi Jenny,

Here is some information on the PSP summaries from Steve Riley. This email chain also has some information about current status and involvement of agency field staff involved with local sampling efforts.

Steve: Is there a 2014 PSP status summary from Q2? I couldn't find one in my email.

Thanks,

K

I wanted to forward Kyle Abraham's update on our recent progress regarding the watersheds chosen as candidates for possibly becoming PSPs. And thank him for the update!

And I'll ditto the contributions of the Stewardship Foresters. Their input in identifying possible monitoring sites and their willingness to help with sample collection has been extremely valuable in helping us move forward in the selected watersheds.

In addition to Kyle's acknowledgement of the Stewardship Foresters, I want to especially acknowledge the contributions of Beth Pieterzak and Ellen Hammond of ODA, Heather Tugaw, Pam Blake, Jackie Fern and Bill Myers of DEQ. Their knowledge, networking and relationships with local SWCDs, Watershed Councils, Tribes, OSU Extension, and businesses & land owners who have participated in the planning meetings this year has been invaluable in laying the groundwork and helping us move forward under a positive environment.

Steve

Hi All,

I wanted to provide you all with a very brief update and also to acknowledge the support of the Stewardship Foresters who have participated in regional meetings.

Currently, the Medford pilot PSP is collecting data and has also collected data this past spring in tributaries to Bear Creek (with input from Tyson). Two other pilot areas, South Umpqua and Coos/Curry County just recently completed meeting with local partners including watershed councils and soil and watershed conservation district staff and board members (with help from Jay, Mike, and Stacy). The meetings were all very positive. Local partners were excited about the program, the potential for data collection, and knowing more about their watersheds. These final two areas are hoping to have data collection this fall and will also have data collection in the spring of 2015. South Umpqua and Coos/Curry areas will still require a bit of refinement for sampling sites and the stewardship foresters are on tap for that information exchange. Given the very tight time frame for fall sampling we may need to be creative with regards to data collection. ODA and DEQ are taking the lead on that front, but there may be a potential need for local ODF to help out. If that becomes the case, we will work to make that happen as smooth as possible.

Overall, the pilot PSP areas are moving ahead and I again want to thank everyone for their participation to date.

Thanks,

Kyle Abraham <[mailto:kabraham@odf.state.or.us](mailto:mailto:kabraham@odf.state.or.us)>
